Tongue & groove installation.

100% Waterproof
Ideal for wet areas.

Easy Fix
Using DumaFix adhesive.

Clean
No more dirty grouting.

Easy Cover
Covers old walls.

Easy Size
Easy to transport.

The do-it-yourself Tile

Installing DumaWall is quick and easy, where there is now no need to work with complicated grout lines, tools and costs associated with Ceramic tiles. DumaWall tiles provides the look of Ceramic tiles, features an interlocking tongue and groove system and can be easily cut on site with circular skillsaw or jigsaw, providing the ideal home handyman solution at minimal costs compared to a professional tiler.

Easy to glue with DumaFix

DumaFix is a high-quality, quick hardening adhesive based on an MS polymer. DumaFix is suitable for fixing and installing DumaWall+ tiles, DumaWall XL panels and trims on basically any surface (porous and non-porous surfaces).

DumaWall is a lightweight, easy to install waterproof wall tile. Produced with the revolutionary patented RCB[®] (Rigid Core Board) technology and featuring an interlocking tongue and groove system, DumaWall is durable, 100% recyclable, obtains a Pass[™] and meets New Zealand Building Code.

DumaWall+ comes in a handy tile size of 375mm x 650mm and DumaWall XL is available in 2600mm x 900mm, making shower walls and large areas quick and simple to cover. Both DumaWall+ and DumaWall XL come in a range of contemporary colours that suit a variety of interior spaces.

Note: Due to different production processes between the Dumawall XL and Dumawall + there could be slight colour differences if both products are installed in the same room.
